CUTIMED® SILTEC® SORBACT®
Bacteria-Binding Silicone Foam Dressing
FOR SUPERIOR FLUID AND INFECTION MANAGEMENT

- Ideal healing conditions due to moisture-balancing, highly breathable PU films
- Gentle fixation silicone border
- Increased flexibility of absorption capacity due to super-absorbent hot-melt stripes
- Protects wound edges through vertical absorption with polyurethane foam
- Sorbact® Wound Contact Layer manages and prevents infections

Siltec® Foam Technology + Sorbact® Antimicrobial Technology

THERAPIES. HAND IN HAND.
ABSORPTION THAT ADAPTS + SORBACT® TECHNOLOGY

Cutimed® Siltec® Sorbact® is an innovative combination of reliable absorption and Sorbact® Technology. The super-absorbent particles within the foam layer effectively adjust to absorb moderate to high, viscous exudate and retain it even under compression.

TOTAL FLUID HANDLING CAPABILITY

- Super-absorbent hot-melt stripes ensure vertical absorption of exudate reducing the risk of maceration.
- Dynamic MVTR allows fluid to transpire while also maintaining a moisture balance.
- Good flexibility and conformability with new unique sizes. Easy application and reliable adhesion on contoured body parts and joints.
- Silicone layer minimizes pain with atraumatic dressing changes, and wound bed remains undisturbed. This increases patient comfort and compliance.

TOTAL FLUID HANDLING CAPABILITY

- 80 Retained fluid after compression (%)
- 60
- 40
- 20
- 0

Lab test: Cutimed® Siltec Sorbact® has the highest retention under compression of all tested products (2011, in-vitro, data on file)

Indications

Cutimed® Siltec® Sorbact® is indicated for use in the prevention of infection and management of clean, colonized, contaminated or infected, shallow wounds with Moderate to High exudate levels such as venous leg ulcers, pressure ulcers, diabetic foot ulcers, post-operative and trauma wounds.

It can also be used as an absorbent secondary dressing on deeper wounds.
